MICHIGAN STATE POLICE SERVICES DIRECTORY	23

A MESSAGE FROM THE DIRECTOR

Dear fellow citizens and community leaders:

Since its beginning in 1917, the Michigan State Police has been dedicated to providing primary law enforcement and quality support services to local, county, and state agencies. With the unique positioning of statewide resources and services, the Michigan State Police remains committed to providing highly trained personnel with high tech equipment and state-of-the-art technology to ensure the safety of Michigan's families is the number one goal of all public safety agencies in Michigan.

It is still true today that no one agency or governmental unit has the resources or personnel to do this job alone. With the help of our partners at the local, county, and federal levels of government, the Michigan State Police is working diligently to prevent crime, apprehend fugitives, improve traffic safety, and ensure homeland security. MSP is both a leader and a partner in these efforts.

Contained in this "Services Guide" are the resources offered by the State Police that are available to every local, county, and state agency. I hope you take advantage of these services as we work together to make Michigan a safer place for all of us.

Sincerely,

Col. Tadarial J. Sturdivant
Director

CRIME AND TRAFFIC

The MSP personnel most visible to the public are the troopers of the Uniform Services Bureau. Their primary responsibility is to deter criminal activity, arrest those who break the law, and assist local public safety agencies in their efforts to protect the public.

Assigned to work locations statewide, with the authority to work across jurisdictional boundaries, these troopers provide a full range of services, including the investigation of crimes, apprehension of criminals, traffic patrol, and the preservation of law and order throughout Michigan.

Traffic Safety and Enforcement

The MSP participates independently and cooperatively with local and county police agencies in traffic enforcement programs. These programs focus on safety belt use, drunk driving, aggressive driving, speeding, and construction zone enforcement.

Motor Carrier Enforcement

“Motor Carrier” is the term used to define commercial trucking in Michigan. The Motor Carrier Division of the Michigan State Police is responsible for commercial vehicle enforcement, including overseeing the transportation of hazardous materials, the enforcement of trucking safety laws and weigh restrictions, investigating administrative and maintenance procedures of local trucking companies, and providing local schools districts with school bus safety inspections. The Motor Carrier Division also plays an important role in Michigan’s homeland security

efforts by ensuring the safe transport of hazardous materials and by monitoring vehicle border crossing between the United States and Canada.

Types of Work Sites

The MSP is divided into seven districts that cover all 83 counties of the state. In these districts, there are:

- 64 Posts

A post is a state owned or leased building with full-service law enforcement capabilities.

- 19 Satellite Offices

A satellite office is a space made available to any trooper assigned to the post area. These offices are intermittently staffed.

- 8 Resident Trooper Concepts (RTCs)

RTCs are permanently established work sites within the patrol area of the parent post. RTCs are established to provide better police service to rural communities that are either without their own police agency or where there is a need to enhance existing patrol coverage without increasing costs to the community. Two troopers are generally assigned at each RTC location, which serves as their base of operations.

- 7 Detachments

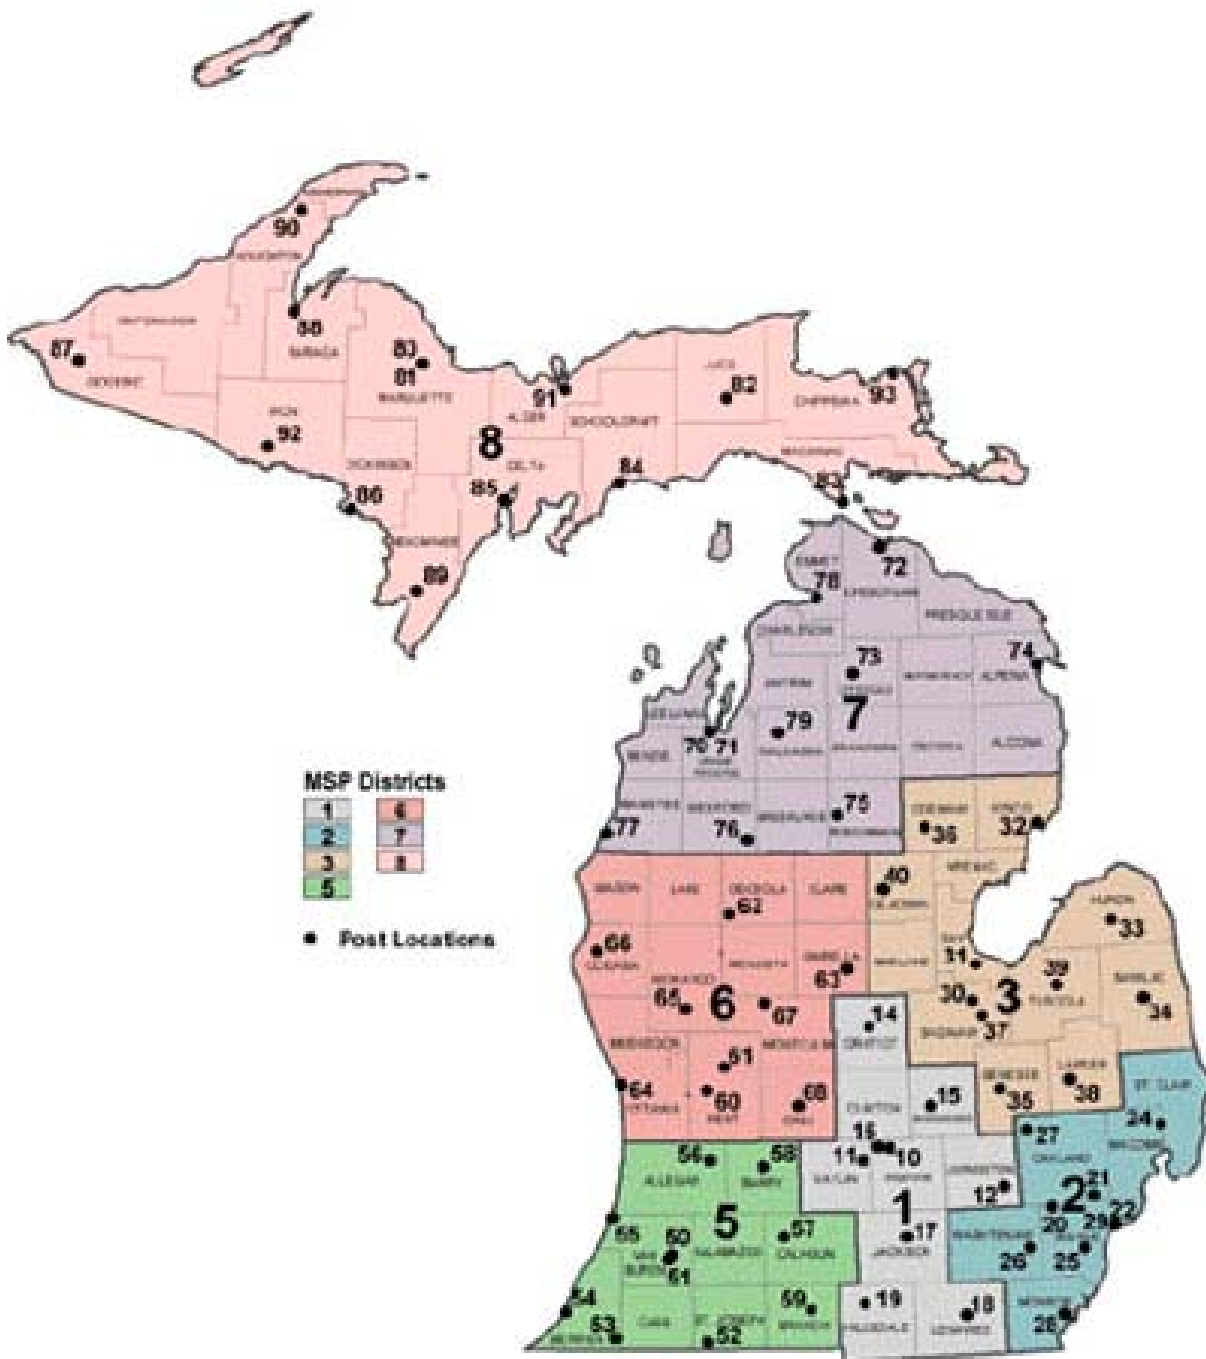

A trooper detachment is usually established to enhance existing police services within a rural community. Troopers are not permanently assigned to these offices, but, instead, they patrol the detachment area on a rotating basis from the home post. The detachment provides the community with a point of contact for the state police and allows the troopers to conduct necessary business while on assignment.

- 19 Weigh Stations

Weigh stations are fixed locations staffed by Motor Carrier Officers to detect and prevent violations of laws governing the operation of commercial vehicles.

District & Post Locations

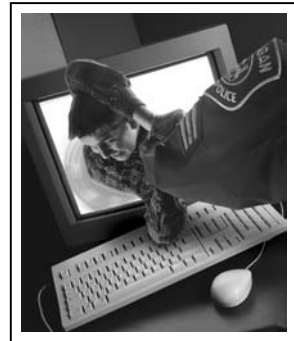

SPECIALIZED INVESTIGATORS

Criminal Investigation Divisions (CID)

The investigators of the CIDs are available upon request for undercover operations, narcotics investigations, surveillance and technical services, still photography and aerial surveillance, assistance in locating or apprehending fugitive felons and escapees, and auto theft investigations.

- **Computer Crimes Units**

The Computer Crimes Units, located in Lansing and Livonia, conduct computer forensic exams to acquire digital evidence and initiate on-line investigations. Investigations conducted include fraud, identity theft, child pornography, cyber stalking, gambling, and computer invasion.

- **Major Case Team**

The Major Case Team conducts criminal investigations and provides support regarding organized crime and allegations of public corruption. Investigations include organized illicit gambling, murder-for-hire, extortion, bribery, embezzlement, forgery, counterfeiting, stolen property, and various forms of fraud.

- **Gaming Section**

This section assists the Michigan Gaming Control Board (MGCB) with the licensing and regulation of the MGM, Motor City, and Greektown Casinos in Detroit. They also provide criminal enforcement and public safety at each facility, while working cooperatively with the Detroit Police Department Gaming Division and the security and surveillance departments at each casino.

- **Fugitive Teams**

The MSP has multiple fugitive teams stationed at various locations across the state. Their primary objective is to target the most serious offenders, who are responsible for 50% of all crimes committed. The fugitive teams also provide surveillance support to local law enforcement, as well as local narcotics teams and detectives.

- **Tobacco Tax Unit**

The Tobacco Tax Unit identifies, investigates, and assists in the prosecution of individuals and businesses who are in violation of the Tobacco Products Tax Act. This team works out of offices in Livonia and has statewide responsibility.

- **Technical Services Unit**

The Technical Services Unit provides assistance and education to law enforcement agencies throughout the state. This Unit functions as a support unit, by assisting with the gathering of technical evidence or the enhancement of taped evidence for use in criminal prosecution.

- **Meth Team**

The MSP Meth Team has statewide responsibility for identifying and investigating those individuals involved in the use, possession, distribution, and manufacturing of methamphetamine. Team members are trained to safely dismantle clandestine drug labs, and provide Meth awareness training to public safety personnel around the state.

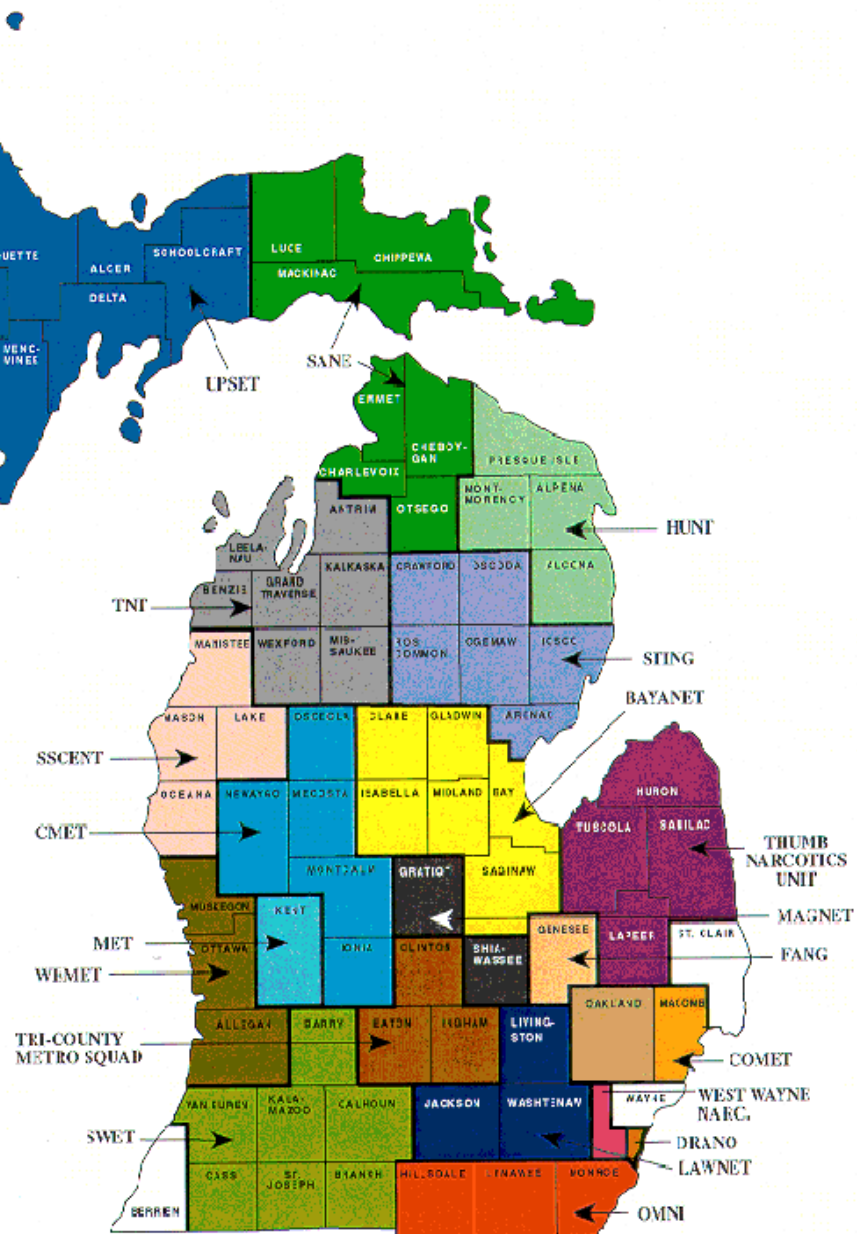

- **Fire Investigators**

The Fire Investigation Unit has detectives at several locations around the state who are responsible for investigating the origin and cause of fires, as well as fire-related fraud. They also respond to hazardous materials incidents and requests for imminent hazard abatement, and conduct training in arson awareness for local fire departments. An “Arson Tipline” is also administered by this unit.

- **Multijurisdictional Task Forces**

The MSP currently participates in 22 multijurisdictional task forces. Each task force is staffed by a combination of state, county, local, and federal law enforcement officers. These teams build on interagency cooperation and coordination to conduct investigations into narcotics, violent crimes, fugitives, cold-case homicides, and auto theft.

Michigan Multijurisdictional Task Forces

Field Detective Division (FDD)

The FDD provides investigative services to local, county, state, and federal law enforcement agencies in each of Michigan's 83 counties. The FDD has detectives who conduct investigations in specialized fields such as cold case homicides, serial killings, fraud, felonious assault, and criminal sexual assault. The division also assembles task force investigators to assist in handling critical incidents.

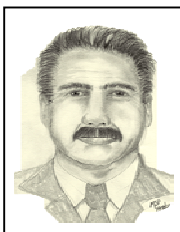

- **Violent Crimes Unit**

This Unit provides crime scene assessment and can develop offender personality profiles. The Violent Crimes Unit acts as a statewide resource for investigators and helps local agencies develop interview and investigative strategies. The Unit also maintains computerized files for sex-motivated crimes and solved and unsolved homicides.

- **Intelligence Unit (IU)**

The IU provides investigative assistance to law enforcement agencies throughout Michigan, nationally, and internationally. The IU serves as a statewide intelligence network that encourages and facilitates the free flow of information with law enforcement agencies throughout the state. The Unit works proactively by anticipating and preparing for events that could adversely affect the safety of Michigan's citizens. A dedicated intelligence officer is available at most MSP work sites, as well as at many local police agencies across the state through the Intelligence Liaison Officer program, which seeks to increase intelligence exchange. The IU also manages the state's online criminal intelligence reporting system, the Statewide Information System (STATIS).

- **Forensic Artists**

Forensic artists are available at various locations around the state for use in depicting criminal suspects, identifying unidentified human remains, and diagramming crime scenes. Composite sketches of wanted suspects and 2-D and 3-D drawings of unidentified human remains can be found online at:

www.michigan.gov/forensic_artists

Traffic Crash Reconstruction

The Uniform Services Bureau provides accredited traffic crash reconstructionists who can map crime scenes and create traffic crash forensic animations to determine the cause of a traffic crash.

HIGH-TECH CRIME SOLVING

Forensic Science Division

The Michigan State Police maintains seven forensic science laboratories; Lansing, Northville, Sterling Heights, Bridgeport, Grand Rapids, Grayling, and Marquette. These geographic locations provide easy access to evidence analyses, as well as timely response to crime scene investigation and processing. The following services are provided through these labs.

- The **Automated Fingerprint Identification System (AFIS)** provides computerized

comparison of crime scene fingerprints and booking prints against the state's master fingerprint repository. If the AFIS system is unable to match a latent print during a database search, it stores the print in an unsolved file. As subsequent fingerprint cards are received and entered into the system, they are compared against the unsolved file. If a hit is made, the submitting agency is notified.

- **Drug analysis** is performed using a number of chemical methods, which include classical wet chemical methods, as well as modern hi-tech instrumental methods. The data from these tests is handled by computers, which not only organize and print hard copies of the data, but also have databases that aid the chemist in identifying unknown substances by comparing them with known substances.

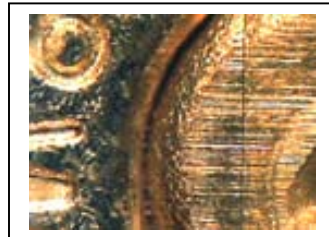

- **Artificial intelligence and expert systems** allow the investigator to model and represent investigative theories, develop crime scene reasoning and logic, and profile criminals.

- New **DNA** typing methods enable forensic scientists to identify an individual more conclusively than ever before. In cases where a suspect has not been identified, the DNA profile obtained from evidentiary items can be entered into the **Combined DNA Index System (CODIS)**, which is administered by the FBI. The CODIS system enables federal, state, and local crime laboratories to exchange and compare DNA profiles electronically. This allows for possible DNA matches to convicted felons nationwide, as well as linking serial cases.

- The **Firearms Unit** examines a wide variety of firearms and components of fired ammunition. They also conduct serial number restoration, gunshot residue pattern, distance determination analysis, and toolmark-related evidence comparisons. Examiners utilize the **Integrated Ballistics Identification System (IBIS)** to digitally capture the images of bullets and cartridge cases, so they can then be compared to other images in the database in an effort to link previously unrelated shootings.

- Handwriting samples and other documents are examined by the **Questioned Documents Unit** for all types of criminal cases. Questioned documents may include writing, printing, ink, paper, impressions, typewriting, typewriters, checkwriters, photocopiers, alterations, obliterations, or torn, faded, charred, burned, or water-soaked documents. Laboratory reports are issued to submitting agencies, and expert testimony is given in court.
- The MSP maintains multiple locations across the state for **polygraph examinations**. The opinions of examiners fall within the following ranges: Deceptive, Truthful, or Inconclusive. This range of opinions allows the examiner to take into account variables that may exist that are both intentional as well as non-intentional.
- The **Toxicology Unit** analyzes biological samples for the presence of alcohol and drugs. The Toxicology Unit is located in the Lansing Laboratory and handles alcohol and drug cases from the entire State of Michigan.

INFORMATION SHARING

The Michigan State Police is a leader in statewide criminal justice records management and maintains the latest technological equipment for information sharing between law enforcement agencies.

Michigan Criminal Justice Information Network (MiCJIN) portal

MiCJIN provides law enforcement agencies with access to multiple information services via a single web page. The services available through MiCJIN include:

- **Law Enforcement Information Network (LEIN)**

LEIN is computer-based repository of data supplied by local, county, and federal agencies in the areas of stolen property and vehicles, wanted and missing persons/children, criminal history, gun registration files, data communications, and uniform crime report. LEIN is linked to the FBI, National Crime Information Center, Michigan Secretary of State, Michigan Department of Corrections, other states, and Canada.

- **Automated Pistol Registration System (APRS)**

APRS interfaces with LEIN to automate the issuance of required forms needed for purchasing pistols, issuing licenses, and providing safety inspection certificates. APRS searches the National Crime Information Center, National Instant Check System, and the Corrections Management Information System.

- **Michigan Incident Crime Reporting (MICR)**

The MICR program is a valuable crime-fighting tool that identifies when and where crime occurs, what form it takes, and the victims' and offenders' characteristics.

- **Law Enforcement Agency Management System (LEAMS)**

LEAMS is a records management system for law enforcement. LEAMS is MICR compliant and compatible with a variety of wireless infrastructures, including Pocket PCs and Global Positioning Systems. Future enhancements will include citation, crash and intelligence reporting features.

- **Statewide Network of Agency Photos (SNAP)**

SNAP is a statewide system for electronic collection and dissemination of digital criminal images including mugshots, scars, marks, and tattoos. Using Live Scan technology, these images are available through a web browser front end to law enforcement agencies across the state.

- **Michigan Digital Image Retrieval System (MiDIRS)**

MiDIRS provides law enforcement officers with a secondary photo source if a mugshot is unavailable or out of date. MiDIRS utilizes a direct connection to the Secretary of State's Drivers License Photo database.

- **Michigan Law Enforcement Source**

The Michigan Law Enforcement Source, also known as "Ask Miles," is a web-based search engine for law enforcement. With one query, Ask Miles searches various databases to compile suspect lists or eliminate suspects.

Live Scan

Live Scan is an electronic fingerprint capture system that allows law enforcement agencies to immediately identify a subject and compare his/her fingerprints taken at the point of arrest with millions of fingerprints in an Automated Fingerprint Identification System (AFIS) file within minutes.

Sex Offender Registry

The Criminal Justice Information Center maintains the Michigan Public Sex Offender Registry. The Registry became available to the public in 1996, and was made accessible via the Internet in 1999. To view the Registry, go to www.mipsor.state.mi.us.

Internet Criminal History Access Tool (ICHAT)

The Internet Criminal History Access Tool (ICHAT) provides citizens with an easy and quick way to access the criminal history records of individuals who have been convicted of a crime in Michigan. This service is free to nonprofit organizations. To access ICHAT, go to <http://mi-mall.michigan.gov/ichat>.

SPECIALIZED TEAMS

The specialized support services of the Michigan State Police reduce liability, costs, and risk to other officers by providing local law enforcement agencies with highly trained, specialized response teams with high-tech equipment.

Special Operations Division

The Special Operations Division serves as the 24-hour command center for the Michigan State Police. The division maintains a communications network with other state and national law enforcement agencies.

- **Emergency Support (ES) Team**

The members of the ES Team are specially trained and highly equipped to assist with armed subjects in barricaded situations, hostage situations, hazardous arrests, and search warrant service.

- **Mobilization of Troopers**

A rapid deployment of troopers is available for civil disturbances, disasters, and labor unrest.

- **Canine Teams**

The MSP Canine Unit assists with tracking, missing persons, buried or submerged bodies, explosives, narcotics, crime scene searches, crowd control, and locating of property.

- **Underwater Recovery**

The MSP Dive Team provides year-round assistance with drowning victims, submerged evidence, submerged vehicles, and rescue operations.

- **Field Support and Aviation Section**

The Aviation Unit provides aerial assistance with barricaded gunmen; hostage situations; major fire and arson scenes; aerial assessment of natural disasters and civil disturbances; location of marijuana, drug labs, and auto chop shops; surveillance; search and rescue; forward-looking infrared (heat detection capability); and night sun (night-time illumination capability).

Forensic Science Division

In addition to providing forensic laboratory services, the Forensic Science Division also makes available to local law enforcement the services of two additional specialized teams.

- **Bomb Squad**

The MSP Bomb Squad provides assistance with the safe removal of suspected explosives or incendiary devices. Forensics assistance is also available for the preservation of explosive-related evidence; laboratory analysis of components, debris, or residue; and expert testimony.

- **Crime Scene Response Team**

Crime scene investigators use the latest in forensic crime fighting equipment to preserve evidence at crime scenes. Team members specialize in collecting, preserving, and analyzing blood stain patterns, toolmarks, post-blast scene evidence, DNA, footwear impressions, tire marks, clandestine drug laboratory scenes, and excavations.

EMERGENCY MANAGEMENT & HOMELAND SECURITY

By Executive Order, the Director of the Michigan State Police serves as the Director of Emergency Management and as the state's Homeland Security Director. The commanding officer of the Emergency Management Division serves as the State Deputy Director of Emergency Management and Homeland Security.

Emergency Management Division (EMD)

EMD provides assistance to local agencies for natural and man-made disasters, and serves as the state's liaison with the Federal Emergency Management Agency (FEMA). EMD also maintains the state's Emergency Management Plan.

▪ **Hazardous Materials Training Center**

The MSP Hazardous Materials Training Center provides comprehensive, cost-effective training courses for public and private individuals in hazardous materials response, technical rescue, terrorism response, and preparedness. The Center also coordinates federal training offered by the Department of Homeland Security. Courses are conducted at the facility in Lansing and at various locations throughout the state.

▪ **Emergency Management Planning, Training, and Exercising**

EMD strives to maintain and improve the state's emergency response capabilities through effective planning, training, and exercising. Courses covering a variety of topics are available to individuals at all levels of the emergency management process.

▪ **FEMA Grants**

EMD distributes the Emergency Management Performance Grant (EMPG), which funds local programs to build a baseline capability in emergency management. EMD also distributes the Hazardous Materials Emergency Planning (HMEP) Grant, which distributes fees collected from shippers and carriers of hazardous materials to fund

hazmat training for emergency responders and hazmat planning for Local Emergency Planning Committees (LEPC).

- **State Emergency Operations Center (SEOC)**

EMD is responsible for maintaining the SEOC, which is the command-and-control center for use by the Governor, State Emergency Management Director, and state agency representatives in the case of a state-level emergency or disaster. The Joint Public Information Center, which disseminates information to the media and public

during a disaster or emergency, is located within the SEOC.

- **Michigan Homeland Protection Board**

The Michigan Homeland Protection Board was created by Executive Order as an advisory body to the Governor within the Michigan Department of State Police. This board develops, implements, and revises an effective and coordinated homeland security strategy. This strategy focuses on the indications and warnings of threats, the identification and protection of critical infrastructure in the state, and proper response to emergencies and health issues.

- **Federal Department of Homeland Security (DHS) Grants**

EMD works closely with local emergency management programs to secure federal homeland security funding in an effort to prepare and develop capabilities for a safe and effective response to a Chemical, Biological, Radiological, Nuclear, or Explosive (CBRNE) event. Grant monies are distributed according to the State Homeland Security Strategy (SHSS) and as mandated by DHS. The State Planning Team, which is a group comprised of state and local emergency response representatives from all 12 first responder disciplines, develops the SHSS.

PROACTIVE PREVENTION

Auto Theft Prevention Authority (ATPA)

The Michigan Automobile Theft Prevention Authority, created in 1986, assesses the scope of the problem of automobile theft, analyzes various methods of combating the problem, establishes a plan for providing financial support to combat automobile theft and provides grants for theft prevention teams. ATPA also administers and coordinates multijurisdictional task force teams to solve auto theft problems unique to specific geographical areas.

Office of Highway Safety Planning (OHSP)

OHSP administers and coordinates federal and state highway safety funds. Funds are provided to local agencies for traffic enforcement, education, and awareness on traffic safety issues. OHSP also has a central repository, the Michigan Resource Center, for traffic safety information, videos, and training materials.

Prevention Services Section

The Prevention Services Section delivers community-based prevention services and programs through Post Community Service Officers (PCSOs). The PCSO is trained in areas such as juvenile law and procedure, child abuse and neglect, domestic violence, crime prevention, missing children, internet safety, and Teaching, Educating and Mentoring (T.E.A.M.).

▪ **Amber Alert**

Michigan's Amber Alert program is a voluntary cooperative effort between law enforcement and the Michigan Association of Broadcasters to quickly publicize cases of abducted or endangered missing children. Requests for activation of Amber Alert are handled through MSP Operations.

SUPPORT SERVICES

Training Division

The Michigan State Police Training Division is dedicated to enhancing the professionalism of employees through the development of character and competence. It is recognized that employee development is enhanced when there is a close sharing relationship with other law enforcement agencies. For this reason, the Training Division offers numerous learning opportunities for the criminal justice community such as recruit training; supervisor and leadership development; emergency, pursuit, and precision driving; marksmanship and ordnance training; computer technology; and detective and investigator programs.

▪ **Precision Driving Unit**

The Precision Driving Unit provides training to law enforcement agencies across the country in driving skills, safety, maintenance, and equipment. The Unit also conducts annual testing and evaluation of patrol cars and vehicles submitted by auto manufacturers. The published results are available to law enforcement agencies throughout the world and assist auto manufacturers in the development of future police vehicles.

Chaplain Corps

The Michigan State Police Chaplain Corps began in 1932, with two chaplains, a Catholic monsignor from Flint and a Presbyterian minister from Kalamazoo. Both had previously served in World War I as military chaplains. Today, members of the MSP Chaplain Corps perform a wide variety of pastoral duties, which include providing emotional and spiritual support for department members and their families; visiting sick or injured officers and family members; assisting with spouse and family needs; performing wedding services for department members performing funeral ceremonies; and participating in post or district meetings.

Behavioral Science

The Office of Behavioral Science serves department members and the law enforcement community by providing counseling services to help officers and family members cope with concerns about their job, marriage, family, or other aspect of their daily lives. Individual and family consultation settings allow the Office of Behavioral Science to diagnose problems, make recommendations, offer therapy, and do follow-up consultation. Services also include help with stress reduction, critical incident debriefing, trauma treatment, and chemical dependency assessment.

Traffic Services Section

The Traffic Services Section seeks to improve traffic safety by providing training, education, and traffic safety expertise to the law enforcement community and the general public. Areas of responsibility include Traffic Control Orders, statewide training in Preliminary Breath Test (PBT), Construction/work zone safety, radar/laser instruction, in-car camera technology, Statewide Traffic Safety Grant coordination, child passenger safety, and Michigan Motor Vehicle Code.
